

Dear Parents,

Are you or do you know someone who:

- Is a gardener, landscaper or tree surgeon?
- Understands how to create and maintain biodiverse habitats?
- Understands how to maintain and develop wetland and pond areas?
- Is a builder or has building skills?
- Is willing to donate time and energy to help us?

Introduction

Let us introduce ourselves. We are an elected group of 18 children representing children from years 1 to 6. We meet with Miss Orviss, Avon Class Teacher to look at climate change, its impact on the world and our local environment. What we know is that we need to make a change for the good.....

We have a dream!

As an eco-committee who want to do our part to fight climate change, we have been looking at the school environment and prioritising projects which will make a positive difference for us and future generations of Garden Fields pupils. We looked at this diagram and discussed what we wanted.

Our dream is to:

1. Create habitats in the school grounds which are biodiverse. We want to further develop and maintain the Wildlife area with its pond and wood.
2. Rewild areas of the site and create sensory pollinator pathways to help the insects survive!

Can you help to make our dream a reality? We can't do it without you.

Please contact admin@gardenfields.herts.sch.uk if you want to join us to make a difference for a greener, cleaner future.

Love from, the Garden Fields Eco Committee, Miss Orviss and Miss Palmer, Deputy Headteacher
